## HOLZHAUSEN
### RAUMINSTALLATION, OFFENBACH, 2014

Holzhausen is the second club sculpture by the Offenbach cultural collective GetRich, to which YRD.Works also belonged. It was created on the collective's own initiative as a temporary use in the same vacant warehouse as its predecessor, Holzhausenstraße, which was demolished for it and whose material was reused. Because GetRich shared the hall in cooperation with ArtSpace RheinMain, the sculpture grew upwards: a gallery ran around the dance floor on three sides and offered a view of the action from above. An outdoor terrace was also part of it. What particularly interested YRD.Works in this project was architecture and design made of oriented strand board.

For two years, Holzhausen could be viewed and entered. For the programme, the collective cooperated with the regional music and techno scene, and over the course of the project Holzhausen became part of the club culture of the Rhine-Main region. With the demolition of the warehouse, Holzhausen came to an end as well.
