PELICAN BAY

RAUMINSTALLATION, OFFENBACH, 2014

Pelican Bay (2014) Offenbach

Pelican Bay is a gym that YRD.Works set up in 2014 while studying at the HfG Offenbach, in the basement of the studio building at Geleitstraße 103. The idea came to them while looking for a suitable strength-training option in the Frankfurt area. Name and design refer to Pelican Bay State Prison, a maximum-security prison in California: modelled visually on the weight rooms of US prisons, the fitness equipment was cast from several tonnes of concrete. Like a common room in a prison, the concrete elements were above all functional and could be kept clean with a pressure washer.
